

STANDPOINT

From Prof.Dr. Stoyan Georgiev Milanov, PhD, UMHATEM “N. I. PIROGOV”

About the competition form for occupying the academic position “associate professor” of scientific specialty “Anesthesiology and Intensive care” to Clinic of Anesthesiology and Intensive care, UMHATEM “N.I. PIROGOV” EAD, Sofia, announced in the SG issue 68/31.07.2020, with only one candidate, chief assistant dr. Georgi Zhelyazkov Georgiev, MD.

Dr. Georgi Zhelyazkov Georgiev was born on 26.09.1975. In 1999 he graduated from Medicine at the Medical University- Sofia. He obtained specialty Anesthesiology and Intensive care in 2009. He has an educational and scientific degree “Ph.D.” (2014). He started his professional development in the Center of Emergency Medicine in Yambol, branch city of Elhovo, as a doctor- 1999- 2002. In 2002 he started working as a doctor in the Central Clinic of Emergency Anesthesiology and Intensive care in UMHATEM “Pirogov”. In 2006, after a competition, he was appointed as fellow III degree in the same clinic. In 2010 he held the position of fellow II degree. After holding a competition, he was appointed as a Chief of the General Resuscitation in the Clinic of Intensive care, UMHATEM “Pirogov”, Sofia. Since 2011 he holds the position of Chief assistant in the Clinic of Intensive care in UMHATEM “Pirogov”. Since 2018 he holds the position of Chief of the Department of Intensive care in CAIC in UMHATEM “N.I. PIROGOV” Sofia. Dr. Georgi Zhelyazkov Georgiev is a member of the Association of Anesthesiologists in Bulgaria and of the European Society of Intensive Care Medicine (ESICM). He completed courses and specializations/ post-graduate training for intensively oriented echocardiography WINFOCUS- Milan 2010 and 2011; a course for Doppler's echocardiography in intensive care- Hospital Erasmus, Brussels 2012; course for modern techniques for the assessment of myocardial function- Sofia, 2014; a course in echocardiography for advanced EDEC- Berlin, 2015; a course in echocardiography in the Department of Intensive care for advanced to ISICEM- Brussels, 2017. He has a diploma EDEC- European Diploma in Advanced Intensive Care Echocardiography- 2020.

Scientific activity

For the competition Dr. Georgi Zhelyazkov Georgiev presents 27 scientific works, in 12 of which he is the first or the only author, 14 of them are publications in scientific editions, referred and indexed in worldwide base data with impact factor, 13 of them are scientific publications in unrefereed journals with a scientific review. A reference with 11 citations has been presented. I accept that the total number of points of the candidate, according to the national and the specific for the scientific organization, minimally scientific- metric requirements is 1166. The participant is in a project of the Fund Scientific researches (Mechanic ventilation- weaning) and a project “Seeding LIFE”- organ procurement and coordinators for donation.

Teaching activity, the direction of the publishing activity, and scientific searches

Dr. Georgi Zhelyazkov Georgiev is a Chief Assistant in CAIC in UMHATEM “Pirogov” and lecturer with significant teaching classroom and extracurricular workload, with teaching engagements to the post- graduate students, trainee doctors and specialists of health care, also and a supervisor of doctor’s specialization.

The scientific works, developed from dr Georgi Zhelyazkov Georgiev, can be synthesized in the following directions: contributions with scientific- practical and scientific- theoretical value in the field of etiopathogenesis, prognosis, diagnostic and therapeutic approach in patients with sepsis, in the field of trauma and posttraumatic complications, in the field of epidemiology and therapeutic opportunities in nosocomial infections, in the field of physiological conceptions, the methods for assessing the value status and the value reactivity and their clinical application in intensive patients; researches over the epidemiology, clinical characteristics, and diagnostic-therapeutic opportunities in ARDS; researches for the course and determinants of the output from the process of termination of mechanic ventilation maintenance.

I consider that the presented from d-r Georgi Zhelyazkov Georgiev scientific production has qualitative scientific characteristics, its value is enough and meets the requirements for the aggregate criteria and indexes for holding the academic position “Associate professor”, according to LDASRB- Law of the development of the academic staff of the Republic of Bulgaria and the Regulations for its applying of the Scientific council of UMHATEM “Pirogov”. Led from what has been pointed so far I express my positive assessment and standpoint, and offer to the honorable scientific jury to vote positive for holding the academic position “Associate professor” in the scientific specialty: Anesthesiology and Intensive care” for the needs of the Clinic of Anesthesiology and Intensive care in UMHATEM “N.I. PIROGOV”, Sofia from dr Georgi Zhelyazkov Georgiev.
